

# THE 8 LIFE DESIGN PRINCIPLES

## Life designers

1.

... are curious and appreciative  
instead of skeptical and critical.

2.

... think differentiated  
instead of either-or.

3.

make decisions based on experiences  
instead of assumptions.

4.

... plan with low risk  
instead of big drama.

5.

... create new realities through prototypes  
instead of just remaining thinking.

6.

... want to learn from experience  
instead of being fixed to either  
winning or losing.

7.

... use the loop as an iterative move forward  
instead of thinking in "once-and-for-all".

8.

... build a constructive team  
instead of thinking to yourself alone.
